TYPES OF ALABASTER

In ARASTONE, we have different types of **Alabaster.** Currently, we market three varieties:

1 LA ZAIDA

Alabaster stone with an excellent translucidity. Ice white color, veined in reddish and brown.
ARASTONE exclusive variety.

Maximum sizes:
120 x 60 cms.

2 SOTENAL

Translucent **Alabaster** with brown and grey veined.

Maximum sizes:
100 x 80 cms

3 STONE FOR SCULPTURE

Rounded stones of **Alabaster** appropriate especially for sculpture.

Sizes:
From 50 Kg until 5000 Kg (gross)

1 PLAQUE

We have differents forms what adapt to any surface. It's depend of project and its application.

Sizes:
Until maximum sizes of our varieties.

In ARASTONE, we supply the finished material. We adjust to detailed plans (design, sizes, colours, forms and technical specifications).

2 BRICK

Bricks of **Alabaster** allow to separated the differents environments. The light can cross between them.

Sizes:
30 cm x 15 cm x 5cm (thickness)
We adapt sizes to client's project.

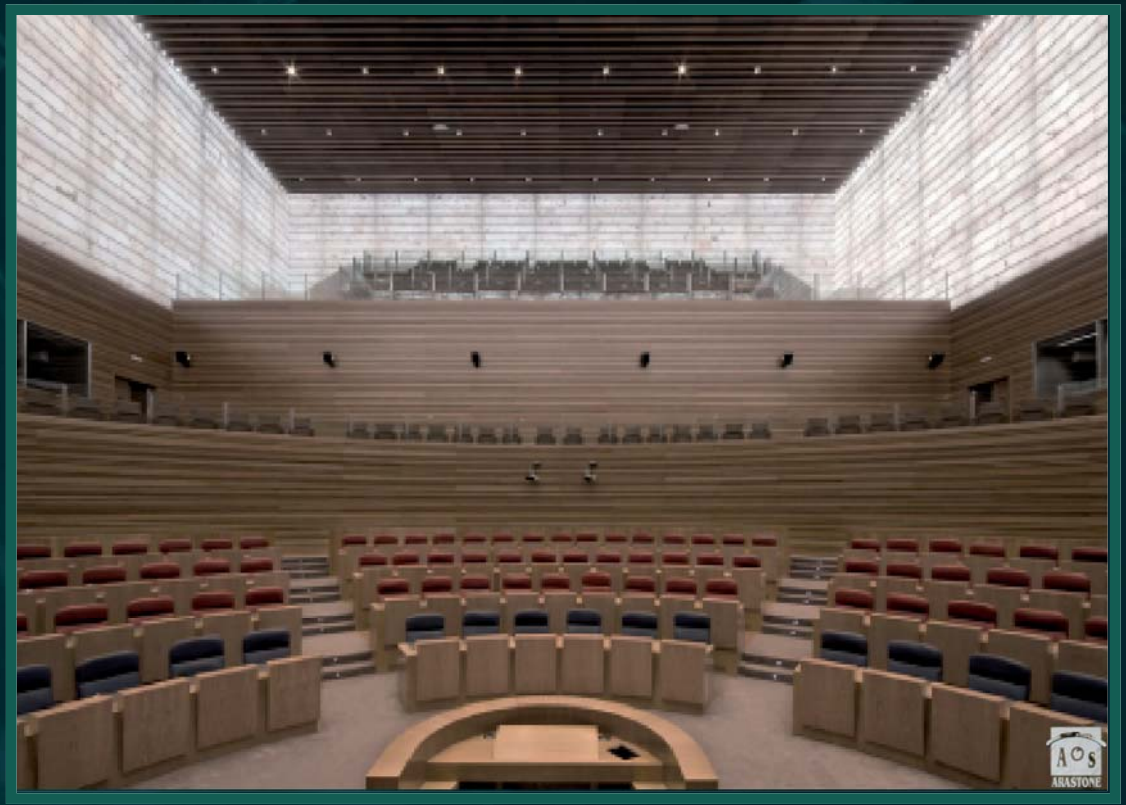
The wall of bricks has a triple function.

Firstly, it is a closing.
Secondly, it is translucent so, it allows interior lighting with natural light.
For the last, it can irradiate light to outside with artificial light.

3 GLASSWARE AND LIGHTS

Alabaster allow inside and outside glazing with minimum thicks of 7mm. (it is depends of sizes).

We have the possibility to use Alabaster like glass in doors and windows, because of its translucence.
Its combination with multiples materials produces a beautiful effect.



4 CEILING

For ceiling, any variety of **Alabaster** can be used with maximum sizes.

Alabaster's translucence allow the cross to natural and artificial light. It creates beautiful effects and warm places of hight standing.

6 SPECIAL PROJECTS

In ARASTONE, we study and carry out special projects depending on clients' necessities.

We adapt their necessities (design, sizes, originality...).
